The Progressive Policy Institute is a catalyst for policy innovation and political reform based in Washington, DC. Founded in 1989, PPI started as the intellectual home of the New Democrats and earned a reputation as President Bill Clinton's "idea mill." Many of its mold-breaking ideas have been translated into public policy and law and have influenced international efforts to modernize progressive politics. Today, PPI is developing fresh proposals for stimulating economic innovation and growth; equipping workers with skills and assets that social mobility in the knowledge economy requires; modernizing the public sector; and restoring American leadership around the world.
