Biography:

Dave Kleidermacher is the VP, Android and Made-by-Google Security & Privacy at Google. In this role he leads the teams responsible for protecting the billions of users and devices in the Android ecosystem and in the Made-by-Google ecosystem - this includes the Android operating system, Pixel devices, Google Fi, and Google's smart home and health devices, apps, and services. Prior to his role at Google, Dave held positions as SVP/Chief Security Officer at Blackberry and VP/Chief Technology Officer at Green Hills Software.

David is also active in global standards committees, focused on increasing transparency for device product security and privacy, including [co-chair of the IEEE 2621 standard](#) for medical device security assurance, member of US delegation to ISO 27402 baseline security requirements for the Internet of Things, and driving related security and privacy evaluation schemes within the Connectivity Standards Alliance, GSMA, and App Defense Alliance.

Dave earned his bachelor of science in computer science from Cornell University and is a frequent speaker and writer in the area of computer security. Credits include delivering the [2014 Embedded World Conference Keynote, "Securing the Internet of Things"](#), [Google I/O](#), and author of the [book "Embedded Systems Security"](#), Elsevier 2012.
